

Science - Home Learning - WB 23rd November

- *Recap different materials and what different things are made of. Why are things made of these materials?*
- *Introduce words such as transparent, magnetic, opaque, absorbent. Talk about what they mean?*
- *What things have these properties? Why do they need them? Do they help their function? e.g some windows are transparent to let the light in but a bathroom window is opaque? Why do they think this is the case?*

- *Complete sheet using household objects to help them experiment.*
