

This is what the children at St Paul's say about maths.....

I love maths because I
like counting and writing
numbers!

I like maths because
it's very challenging.

We learn maths every day
and it's fun!

We learn to add
up...even with numbers
up to 100!

I really like maths because
if we can't do something,
the teachers help us on our
own or with others.

It's easy to learn because
the teachers explain it
really clearly.

I really like maths because
we learn things in lots of
different ways.

I love making patterns in
the cospé.
