

My favourite activity was making the water cycle in a plastic bag. I still have it on my windowsill at home! Jewel

I like Science because in year 2 we exploded a bottle into the air! Jaden

I like when my teacher put some cookies and bananas in a bag and she put them in a sock and in the end she squeezed it out and then the poo came out! It was kind of gross but I learned about the digestive system! Melitta

I like science because we can do messy experiments. I would like to try making elephant toothpaste! Alex

I liked learning about the body and how it works. It's cool to look at and I enjoyed labelling the different parts. Tessa

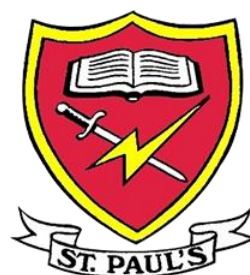

I like doing a chocolate experiment. We got to measure the different melting temperatures of chocolate. We found that the warmer the water the quicker the chocolate will melt! Megan

I like Science because in year 2 we exploded a bottle into the air! Jaden

Science Pupil Voice

I like to do the experiments we do at school with my mum and she sometimes gets confused with how they work so I have to explain it to her. Isabella

I like going to science club with Miss Townley. We learned about a man called Felix who parachuted from space and made our own parachutes and tested them. It was fun! Daisy

I like science because sometimes you can copy experiments at home. When something goes wrong you can still try again and learn from it. Zack

I like when we did the jumping test in Year 2 with a meter stick to see who could jump the furthest. Aiden
